

# NJUST Undergraduate Program of International Economics & Trade in English

## 1. Introduction

For four-academic-year (Fall and Spring Semesters) study, students can learn theories on international economics and international commercial practices. Students can be familiar with current international trade practices and rules and learn about the development of world economy and trade policy of major countries. Besides, students are versatile in foreign trade, management, market research and promotion planning. In other words, students are apt to work in foreign trade units, foreign firms and government departments. Generally speaking, students will excel in the aspects of innovation and application.

## 2. Core Courses

Microeconomics, Macroeconomics, Management Statistics, International Economics, International Trade, International Finance, International Trade Practices, Money and Banking, Accounting, World Economy and International Business Law. (Major Requirements: 108 credits, School Requirements: 14credits, Gateway Education: 10 credits)
